

space bar / longer button
for gripping

circle button

width of handle

dimensions of rectangle
on top

ergonomics of having
buttons protruding on
side of controller

how would people's
hands naturally hold
the controller?

no wider handle
ideally

foot pedal?

↳ could lower
button memory
but then involves
another body
part

how should position
scaling be represented
↳ foot pedal?
but then how
would I differentiate
from increasing/decreasing
scale
